why Web Classroom?

- ❖ A Web Classroom (*WClass*) is a web-based application, which offers students access to educational materials and activities in all those fields of study that could be performed online.
- ❖ *WClass* is not a replacement for a classical face-to-face learning in concrete classrooms, but it greatly supports it.
- ❖ *WClass* has a eight-year tradition at the Ljubljana Faculty of Medicine and many courses have their *WClass* counterparts.
- ❖ All Erasmus students at the Ljubljana Faculty of Medicine have accounts in *WClass*.
- ❖ Many *WClass* courses have e-materials translated to English and put there for Erasmus students.

what is WClass used for

- ❖ Use of educational resources in all computer-displayable formats (in reality mainly ppt slides).
- ❖ Activities and assignments like seminars, surveys, formation of student groups...
- ❖ Performing and assessment of different quizzes.
- ❖ Simple communication between teachers and students and among students, on the individual, group or whole-class levels.
- ❖ Forums as discussion points for study topics.
- ❖ Almost anything else that constitutes academic studies and could be done online.
