

Prilagoditve študijskega režima pri obveznem predmetu Obtočila v 5. letniku magistrskega študija medicine z ozirom na epidemijo COVID-19 in ukrepe za omejevanje epidemije

Predavanja in seminarji

V času, ko predavanja in seminarjev ni mogoče izvesti v predavalnicah, se ta pouk izvede na enega od naslednjih načinov:

1. Predavanja s spletno konferenčno povezavo s programi Webex, Zoom ali podobnimi
2. Predavanja se pripravijo kot video posnetki prezentacij s komentarjem predavatelja
3. Predavanja se pripravijo kot prezentacije (format MS PowerPoint ali datoteke pdf)

Možna je kombinacija omenjenih pristopov, npr. posnetega predavanja in razprave.

Vaje v obliki učnih delavnic

Nekatere vaje potekajo v obliki učnih delavnic. Za izvedbo učnih delavnic velja podobno kot za predavanja in seminarje, prednost pa ima vodenje delavnice na spletni konferenci.

Klinične vaje in praktikum

Klinične vaje in praktikum bodo, kadar bo možno, potekale v majhnih skupinah na kliničnih oddelkih z vsemi varnostnimi ukrepi, ki so predvideni za osebje.

V kolikor se presodi, da so kratke vaje na oddelku neizvedljive, opravijo študenti vse vaje v obliki praktikuma, ki se potem podaljša z 2 na 3 dni.

V kolikor ne bo izvedljiv niti 3-dnevni praktikum, bodo za študente organizirane učne delavnice s primeri.

Izpit

Pisni izpit bo predvidoma organiziran v majhnih skupinah po 6 študentov, ki bodo uporabljali enako zaščitno opremo in ukrepe kot pri kliničnih vajah. Vsebina in način opravljanja izpita za študente ostaneta enaka.

Spremeni se način ocenjevanja: Ker ni možno sprotno preverjanje znanja, je končna izpitna ocena sestavljena samo iz ocene pisnega izpita.

Modifications of the study regime for the compulsory course Circulatory system regarding the COVID-19 epidemic and preventive measurements

Lectures and seminars

At a time when lectures and seminars cannot be held in lecture halls, these lessons are conducted in one of the following ways:

1. Lectures with web conferencing with Webex, Zoom or similar programs
2. Lectures are prepared as videos of presentations with commentary by the lecturer
3. Lectures are prepared as presentations (MS PowerPoint format or pdf files)

A combination of the mentioned approaches is possible, e.g., recorded lecture and discussion.

Exercises in the form of learning workshops

Some clinical exercises will be held as workshops. These workshops are preferably organised as conferences.

Clinical exercises and practicum

When possible, clinical exercises and practicum will take place in small groups in clinical wards with all the required safety precautions.

If the decision is made that due to the situation at a certain point in time short exercises in the department are not feasible, students complete all exercises in the form of a practicum, which is then extended from 2 to 3 days.

If the 3-day practicum is not feasible, workshops will be organized as web conferences.

Exam

We expect to organise the written exam in small groups of 6 students, who will use the same protective measures as during clinical practice. The content and form of the exam does not change for the students.

There is a change in the grading system: Since continuous evaluation during lectures is not feasible, the final exam grade consists only of the written exam grade.
