Five rules of good science writing with overview of ethical guidelines

We would like to invite you to an on-line workshop conducted by Dr. David Peralta on **Tuesday, April 12 at 3pm (CET)**.

The workshop will be held in two parts with one intermission.

15:00 - 16:00 - **Workshop Five Rules for Good Science Writing**

In this slightly more "interactive" workshop, we'll go through the top five tips when it comes to good science writing. We'll cover concrete writing and language exercises and tips, geared towards improved writing and communication in English, with an added focus on style and storytelling.

16:15 – 17:15 - **Workshop Ethical Guidelines in Publishing**

What constitutes plagiarism? To what extent is graphic optimization allowed? How do I properly cite other work? How should authorship be determined? What graphics/data from other papers can I use in my own manuscript? If you've had such questions, this talk is for you. We'll discuss ethical guidelines within the world of scientific publishing. We'll go through some of the most important rules students and professors should remember to make sure their research is written, published, and shared in an ethical manner. As such, we'll look at some examples of the most common unethical practices and also discuss what the repercussions are when such violations occur. We'll also explain how one can quickly and legally share one's published output.

Lecturer: Dr. David Peralta

David earned his B.S. and Master's degree in Chemistry at the Ateneo de Manila University, Philippines. In 2009, he moved to Heidelberg for his Ph.D. at the German Cancer Research Center (DKFZ) and University of Heidelberg. Shortly after his Ph.D., he worked as an Assistant Editor at Wiley-VCH in Germany for the journals *ChemistryOpen*, *ChemistrySelect*, and *ChemMedChem*. He has been the Editor-in-Chief of *ChemMedChem* since 2017. Aside from doing his editorial tasks for the Wiley-VCH journals, he has also given numerous workshops internationally on all topics related to scientific publishing and communication.

Registration on [platform POPR](#).

How to apply if you are not a student or a researcher of University of Ljubljana:

 Enter [POPR](#) and register as »Ostali / Others«.

After completing the registration form, wait for registration confirmation (it should arrive to your email within 24 hours) and then apply to the event through [this link](#).
