

Research projects (co)funded by the Slovenian Research and Innovation Agency

## RESEARCH PROJECT

Member the of University of Ljubljana	<b>University of Ljubljana, Faculty of Medicine</b>
Code	<b>L1-60135</b>
Project	<b>Circulating extracellular vesicles as a source of multi-omic biomarkers of development of asbestos-related diseases and treatment response in malignant mesothelioma</b>
Period	<b>1. 1. 2025 – 31. 12. 2027</b>
FTE	<b>1,03</b>
Head	<b><u><a href="#">Vita DOLŽAN</a></u></b>
Research activity	1.05.00 Natural sciences and mathematics/Biochemistry and molecular biology
Research organizations	<b><u><a href="#">Link to SICRIS</a></u></b>
Abstract	<b><u><a href="#">ABSTRACT</a></u></b>
Researchers	<b><u><a href="#">Link to SICRIS</a></u></b>
The phases of the project and their realization	<b><u><a href="#">PHASES</a></u></b>
Citations for bibliographic records	<b><u><a href="#">Link to SICRIS</a></u></b>
